

Laundry

Varieties of laundry that suits different consumer needs

Front Load

An energy-efficient, high-performance laundry appliance with a door on the front that opens into a horizontal drum.

Dryer

A rotating drum combined with heated circulating air, it quickly dries laundry, saving time and space. It eliminates the need for air-drying clothes on racks or lines.

Washer Dryer

All-in-one that washes and dries clothes, combining the functions of washing and dryer. Popular space-saving solution for homes where separate machines aren't practical.

Top Load

A laundry appliance with a lid on top, allowing users to load clothes vertically without bending over.

SmartThings AI Energy Mode

Monitor and reduce the washer's energy use. AI Energy mode* lets you check the power consumption and estimates your electricity bill. For courses that operate in AI Energy mode** it reduces energy use by up to 70%*** using Ecobubble™ to wash with cool water instead of warm and extra cycle time.

AI Wash

Wash clothes thoroughly* with less water and detergent. AI Wash senses the weight and softness of the fabric and the level of soiling. It then adjusts the water and detergent and the soaking, rinsing and spinning times. By analyzing your washing pattern it can use less detergent**.

AI Ecobubble

Enjoy effective washing with AI Ecobubble™*. It creates bubbles that remove 24% more soil** even in cool water. It also detects the fabric type and adjusts the amount of bubbles, washing time, temperature and spin speed. So it saves up to 70% energy*** compared to washing in warm water and ensures 45.5% better fabric care****.

Bespoke AI Laundry Combo 12/7kg

QuickDrive™

Do your washing quickly. QuickDrive™ is a time-reducing option for 11 courses and, when activated, it reduces the washing time significantly*. Q-Bubble™ combines dynamic drum rotation with extra water shots to make abundant bubbles. So detergent penetrates rapidly and washes quickly and gently.

Super Speed

Cut your daily laundry time and get clothes thoroughly clean. Use Super Speed to wash a load in just 39 minutes*. QuickDrive™ saves time by moving clothes dynamically, while Ecobubble™ ensures powerful cleaning. The rinsing time is shortened using Speed Spray and it accelerates the spin speed.

Reduces Microplastic

The Less Microfiber cycle works to make clothes shed less microplastics, which are discharged into the drain water. By adjusting the motor's revolution speed and washing intensiveness, the Less Microfiber cycle reduces the amount of microfiber released into the drain water by up to 54%*.

Auto Dispense

Automation

Calibration

Sensing

Flexible use

Get great washing results with less waste and effort*. Auto Dispense automatically dispenses the right amount of detergent and fabric softener for each load. It has separate compartments for each, although both can be used for detergent, so there is no need to refill it after every wash**.

AI Control

Cycle Suggestion

Habits Learning

Informative Display and Guide

Wash laundry easily and effectively with AI Control. It personalizes washing by remembering your habits, suggesting cycles* and displaying timely information.

The SmartThings App** offers advice on cycles, planning and troubleshooting. And it selects the ideal drying course for a wash cycle***.

Hygiene Steam

Give clothes a deep and hygienic clean. Hygiene Steam releases steam from the bottom of the drum. It removes grime and 99.9% of certain bacteria* and inactivates allergens derived from house dust mites**. Hygiene Steam reduces exposure to house dust mite, cat, dog, grass pollen and fungi***.

AirWash

Refresh your laundry without washing, boiling, scrubbing or using detergent. Air Wash technology deodorizes garments and bedding, so they smell fresh. Unpleasant odors are removed using just super-hot air. Your clothes will seem like they have been dry-cleaned and will last a long time.

Drum Clean +

Keep the inside of your washer hygienically clean and fresh. Drum Clean + removes dirt and 99.9% of certain odor-causing bacteria* in the drum by soaking, pulsating and spinning. A water jet and fast spinning also remove grime from the door gasket. And it notifies you when it needs cleaning**.

StayClean Drawer

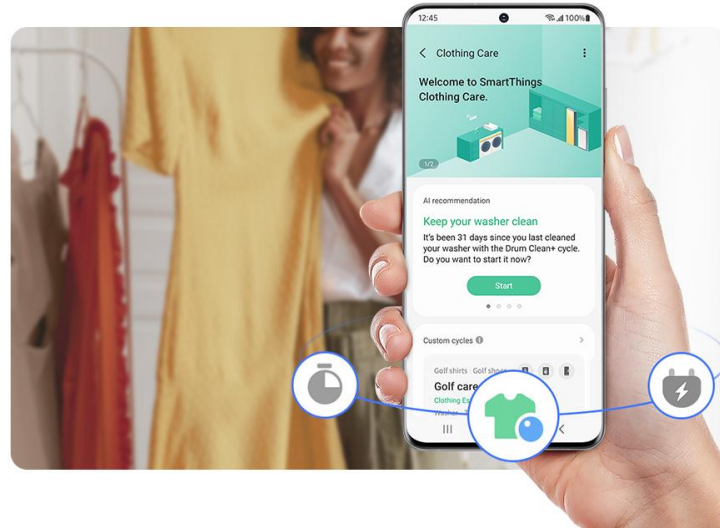

Stop wasting detergent and avoid the tedious task of cleaning the detergent drawer. The StayClean Drawer ensures that more of the detergent is washed away with a specially designed water flushing system. So there is less unsightly soap residue and the tray stays clean and hygienic.

SmartThings meets AI Home

With SmartThings as enabler of AI Home, We can fulfill consumers' unmet needs

Our Solution

We can deliver AI Home experience that provides users
what they've been seeking for at home : Quality Time

SmartThings

Can fulfill consumers' unmet needs with tangible AI Capabilities

Easy

Save

Care

Secure

Market Insight

Still focusing on device control,
automation, connectivity

Consumer Insight

Lots of burden and struggles at home,
Lacks quality time

SmartThings

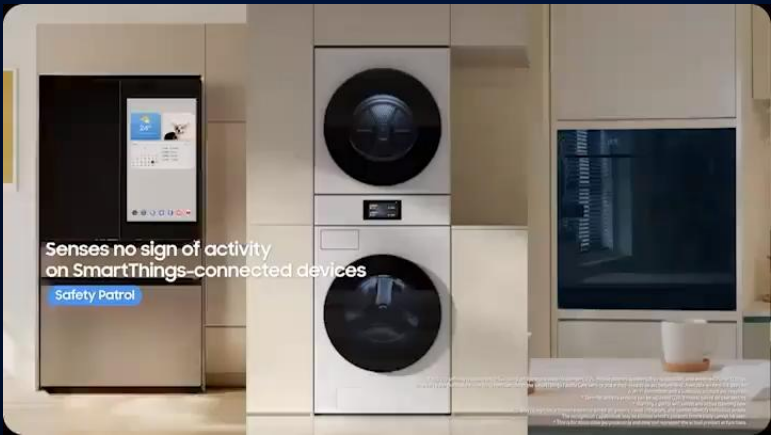

Life gets better, the more you connect

Easy

Makes your home life easier by simplifying everyday tasks and providing useful suggestions.

Care

Helps you care for loved ones by creating a comfortable home and monitoring their health and safety.

Save

Saves you time and energy by improving the efficiency and automating the use of your appliances.

Security

Safety with Knox Security

Knox

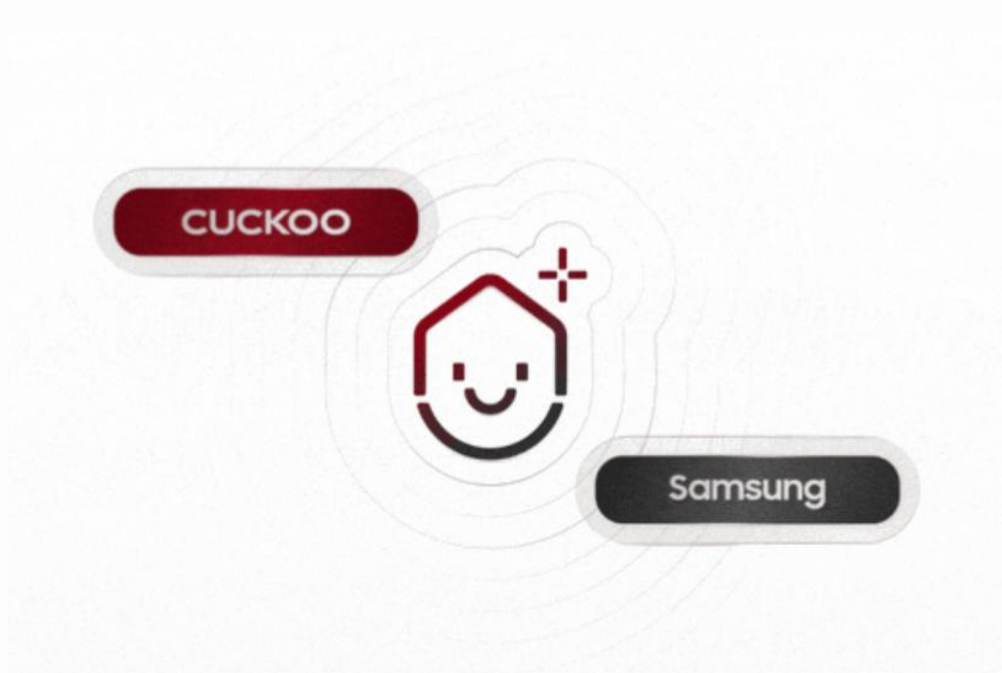

Protects your smart devices and personal data. So you can enjoy total peace of mind, built right in.

Knox Matrix

Creates an ecosystem of Samsung devices to secure data and help them protect each other from threats.
